RENS METAL DETECTORS

RENS Metal Detectors are designed to save you money.

We have been manufacturing metal detectors for industrial applications for more than 70 years.

Whatever your needs are we have a detector to keep metal from damaging your equipment. There is no situation we can't adapt to or figure out. Let us help you save down time, save equipment and keep profits flowing.

TESTIMONIAL FROM A LONG TIME CUSTOMER

To the RENS Metal Detector Company,

I purchased my metal detector back in 1998 after much deliberation but after wrecking another 52 inch circle saw blade at a cost of \$1800 as a result of slamming an embedded railroad spike, I decided I had no choice. I purchased the RENS after extensive research to buy the most dedicated metal detector rather than some universal treasure hunting type machine. I was hesitant to spend such a large sum of money but finally figured I was spending it anyway in sharpening time and effort, down time and poorly manufactured lumber as a result of hitting metal. Even small nails or hooks were enough to throw my mill out of alignment and cause the blade to over heat and other related problems.

My new RENS metal detector worked remarkably well. I could penetrate almost 2 ft of wood and I could even scan the with a quick roll. It didn't take long to find embedded metal that would have cause damage to my blade. I found I could actually remove specific metal and still use the log. This thing really worked; it exceeded my expectations .

Over the years I never had a single problem I wished I could say the same about other machines I purchased .

Recently I found my battery's had finally quit and I was able to return to the same company for replacements, what a relief to know somebody still supported this 16 years later. Not many companies stand . . . the test of time RENS has.

I just wanted to spread the word and thank RENS for a quality product that works and let other saw millers know it is worth the investment, you can't afford not to buy one.

Sincerely Larry White,
Traditional Wood Services
